

START by holding the decoy horizontally out away from your body with the head down and the legs draped over.

With one hand on the front pointing down and the other hand on the back with your thumb pointed up, twist the hand with the thumb pointing up forward...

and the hand with the thumb pointing down backward...

As you start the twisting motion, push inward like an accordion. Continue to twist and push, then cross your hands and bring the decoy into your body. The band in the decoy will form three rings...

... which will line up over each other as you continue twisting, locking gently into place.

Congratulations! You now have a compact decoy, easy for stowing and carrying. and carrying.

POLE DIRECTIONS:

Enclosed are two leg poles. Insert both poles (not the stake end) into sleeves sewn inside the decoy legs. Pole marked Front goes inside front leg, Rear inside rear leg.

The sleeve opening is located in the bottom of each decoy leg.

Slide the poles up into the sleeve and hook the elastic strip into the adjustable pole clip.

Set the pole into the ground using your foot and you're ready to go!
